

Handrail Extension

for alternating tread stairs

Details

- For use with Optional and Flush Handrails models only
- Extends the safety of the alternating tread stair beyond the handrail for rooftop hatch application
- Attaches to both 56 and 68 models
- Not for use with Aluminum Alternating Tread Stairs
- Available with right or left mount

Specifications

- The Handrail Extension is a protruding handrail that mounts to the side of an Alternating Tread Stair
- Must mount opposite the door swing/hinge
- Made of aluminum with an anodized finish
- Extends between 35" and 44" above the top riser in the up position, depending on handrail and stair angle
