Industrial Work Platforms

Benefits and Options

Lapeyre Stair offers heavy-duty industrial work platforms that are OSHA and IBC-Industrial compliant and provide safe access for daily operations, routine maintenance, or any other application.

01 Expedited Drawings
Our designers and customer service experts work with you to deliver pricing and drawings often within 24 hours.

04 Heavy Gauge Builds
Our heavy-duty materials and guaranteed precision combine to product a product that is with 1,000 lb capacities, standard.

02 Compact Footprints & Custom Heights
Equipment platforms that support tight vertical and horizontal clearances where traditional stairs won't. Ideal for UPS rooms, battery strings, mezzanines, and interstitial floors.

05 Compliance Experts
Our team of designers, engineers, and customer service experts will consult with, architects and contractors as well as safety and operational personnel to make sure your build is compliant, safe, and meets your needs.

03 Simple On-Site Assembly
Our knock-down design ships flat, arrives ready to assemble, and required no welding or expensive equipment for installation.

06 Engineered Ladder Alternatives
Provides a safer, more ergonomic alternative to vertical ladders for frequently accessed equipment — without sacrificing valuable space.

Formed vs Ready to Assemble

Formed industrial work platforms are compatible with alternating tread stairs and OSHA-compliant bolted access stairs. They are ideal for crossovers, equipment access, intermediate landings and exit landings.

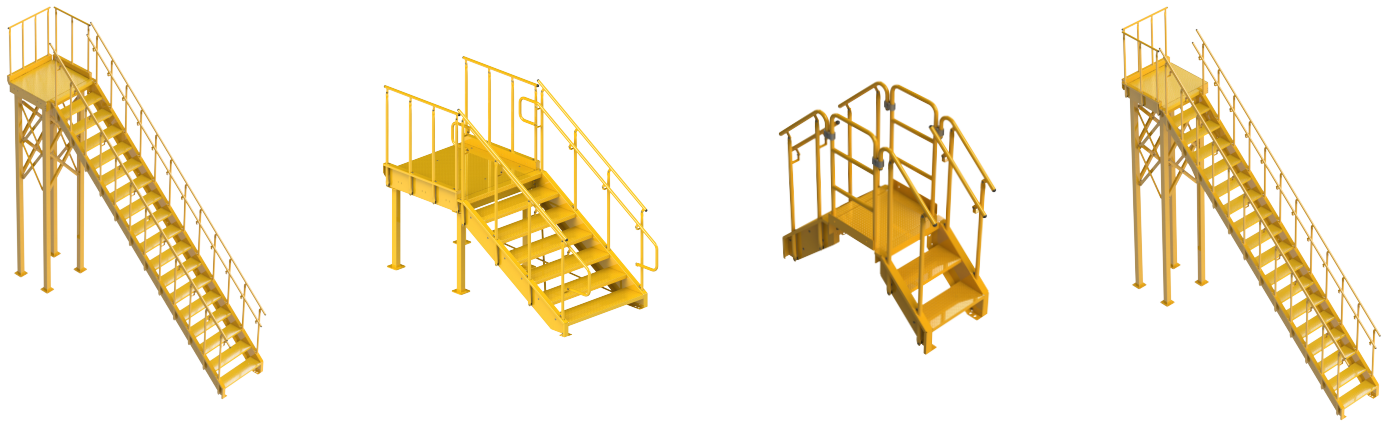

Ready-to-assemble work platforms are ideal for complex stair systems and custom configurations.

- Constructed of a single piece of formed metal
- Standard platform decking surface is constructed of 3/16" diamond plate
- Choice of standard layouts and sizes or custom sizes up to 54" X 144"
- Available in carbon steel, stainless steel, and aluminum
- Mounting hardware and clamps are included
- Guardrails available on all sides
- 1 1/2" round tube construction
- 42" top-edge rail height
- Horizontal midrails

- Module sizes available to 60" x 186"
- Available in powder coated or galvanized carbon steel.
- OSHA and IBC Compliant Guardrail system with choice of full baluster.
- Decking options include diamond plate and bar grate.

Standard Equipment & Work Platforms

Alternating Tread Stair & Ladder Alternative Space Saving Equipment Access Systems

Custom & Multi-Line Systems

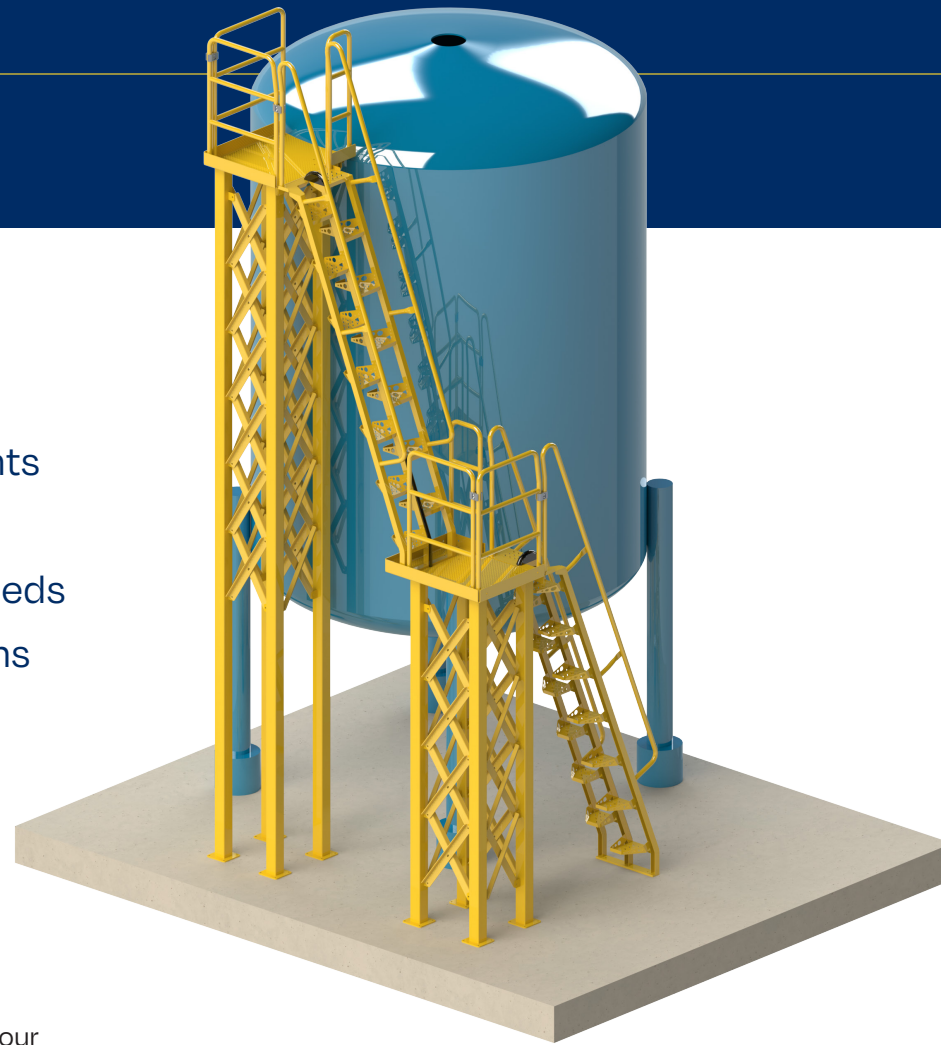

Applications

Equipment Access

- Flexible Modular Components
- Custom Design
- Materials that Meet Your Needs
- Space-Constrained Solutions

Platform configurations with non-slip walking surfaces to integrate into power generator systems.

Access to your generator for regular or routine maintenance can make all the difference to your operational ability. Lapeyre Stair manufactures custom, OSHA-compliant, OEM compatible generator platforms and stairs that provide safe access to elevated generators.

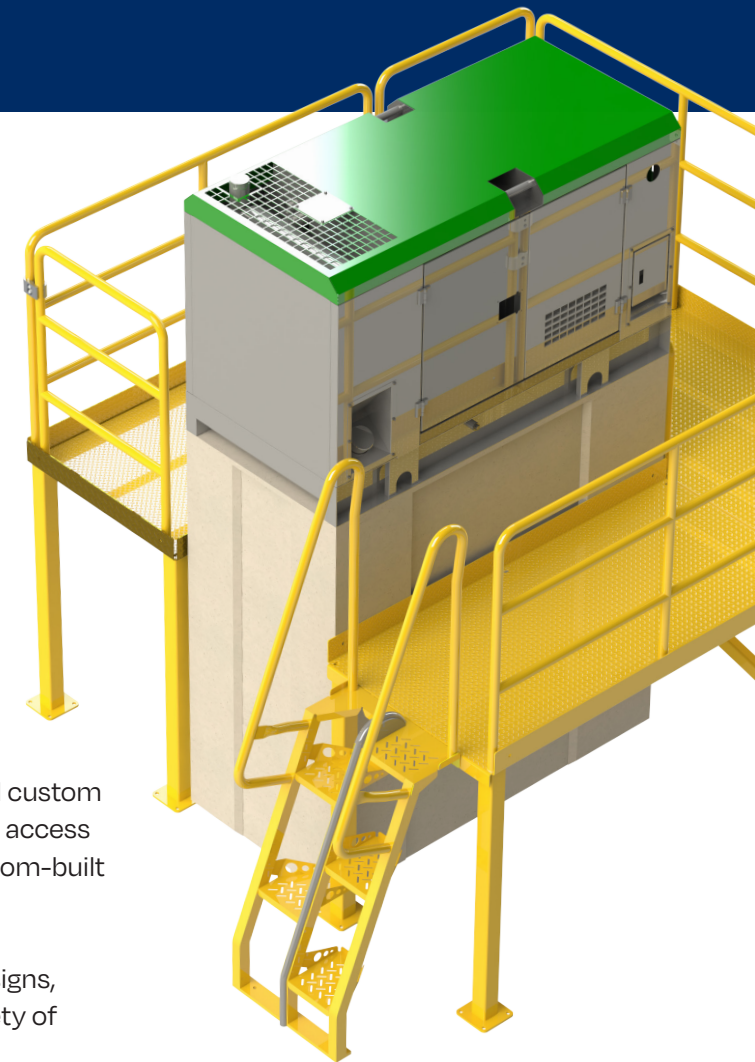

OEM Integrations

- Custom Design
- OSHA Compliant
- Increased Safety
- Fast Lead Times

Custom configured platform systems to integrate seamlessly into your equipment.

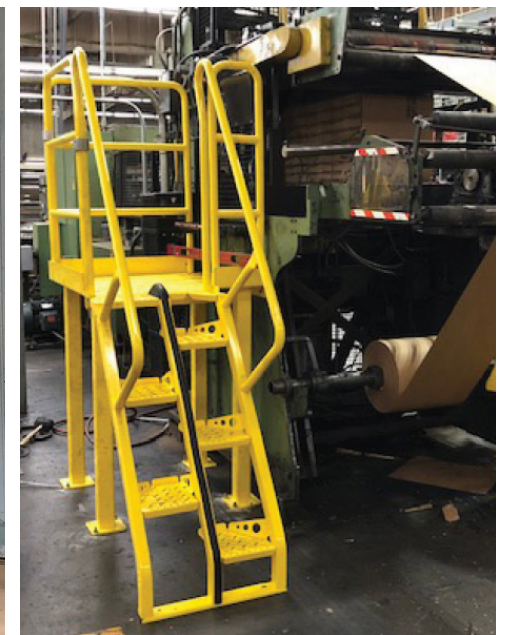

Our OSHA-compliant industrial stairs, alternating tread stairs, and custom systems are a cost-effective option for providing safe and routine access to equipment for workers. We can design and manufacture a custom-built solution for all of your interior and exterior facility access needs.

Lapeyre Stairs are OSHA-compliant, offer affordable, custom designs, standard same-day quotes and drawings, available in a wide variety of options, offer simple, no-weld installation, quick fabrication lead times, and a dedicated support team.

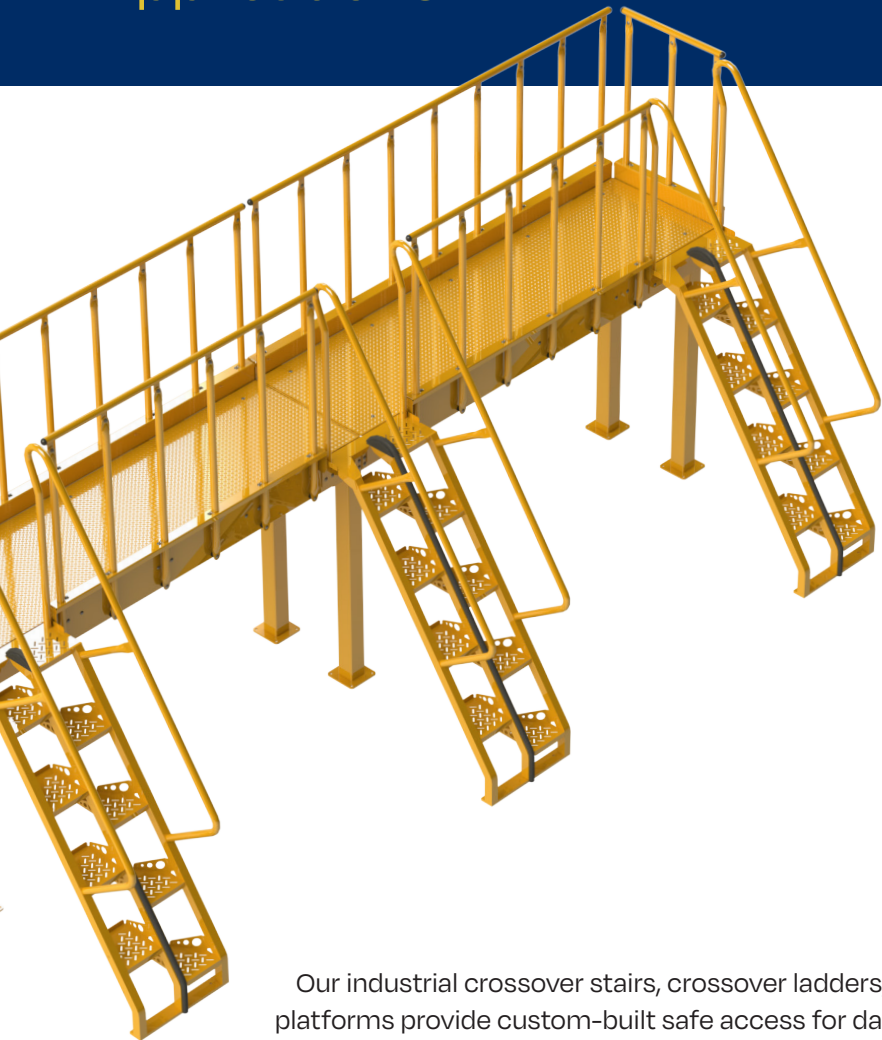

Heavy-duty galvanized platform systems for rooftop HVAC & generator access.

Regular or routine Commercial HVAC system maintenance can make all the difference to your operational ability. Lapeyre Stair manufactures custom, OSHA-compliant, OEM compatible HVAC platforms and stairs that provide safe access to commercial heating and air-conditioning units. They integrate with leading manufacturers, and can incorporate alternating tread and industrial (OSHA) stairs in just about any configuration to overcome your space constraints.

Applications

Crossover Platforms

OSHA Conveyor Crossovers and Conveyor Crossover Bridge Systems

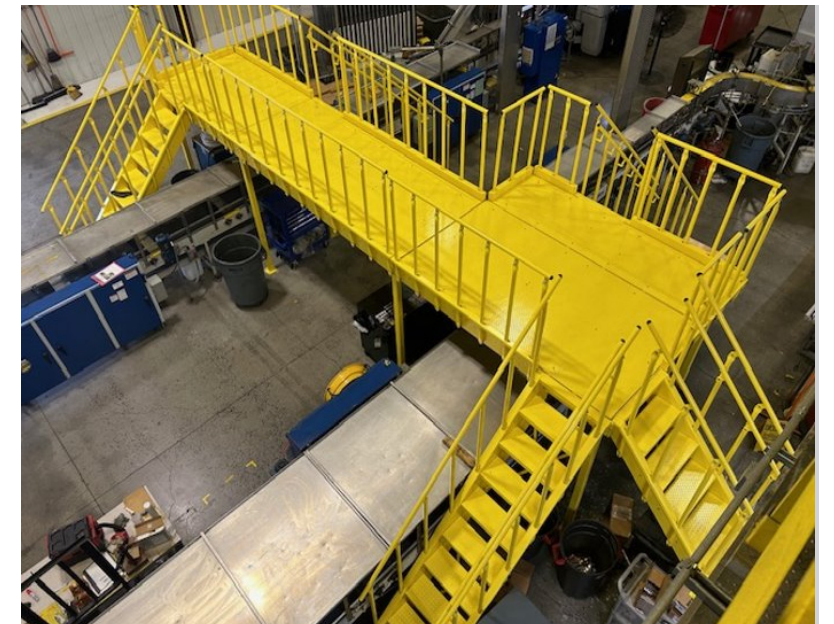

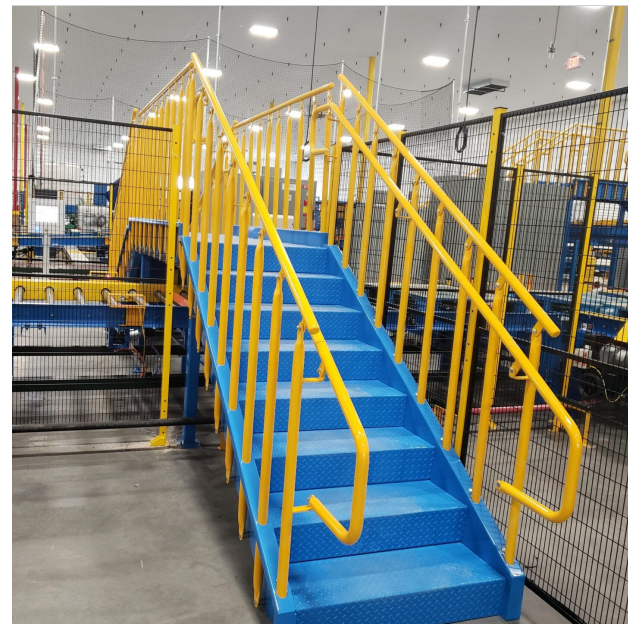

- Space Saving Designs
- Material Handling Expertise
- 15-day Lead Times
- Customized to Your Needs
- Integrator Support
- 1,000 lb capacity

Our industrial crossover stairs, crossover ladders, and crossover bridges alongside rooftop and work platforms provide custom-built safe access for daily operations, and routine maintenance. With standard lead times as fast as 15-days for powder-coated carbon steel systems.

Custom Systems

Lapeyre Stair's integrated systems can include distribution lines, elevated access, and custom equipment access solutions.

- OSHA and IBC-Industrial Compliant
- Designed, Engineered, & Fabricated in-house
- Clearances and Space variances at every 1/8"
- Available in weather-resistant galvanized or sanitary stainless steel
